

Index

Page numbers in **bold** refer to main discussion and those in *italic* to illustrations and tables.

- Absorption spectrum, 37, 37
- Absorptivity, 30, 31, 36
- Adiabatic lapse rate, 64–65
- Adiabatic process, 64, 360
- Advection, 20, 25, 62–63, 89, 167, 236, 248, 253, **321–362**
 - cold air, 62–63, **328–332**
 - heat, 20, 167, 168, 236, 248, 253
 - moisture, 20
 - momentum, 89, 168, 322–328
 - warm air, 62–63, 332, 334, **334–336**, 336
- Aerodynamic approach, 228, 229
- Aerodynamic properties, **189–203**
 - resistance, 369, 370
 - rough surface, 194, 200–201, 200
 - smooth surface, 194, 202, 207
 - transition between rough and smooth, 194–195, 202, 207
- Aerosol, 32
- Agricultural meteorology, 9, **365–389**
 - energy flux, 385–388
 - humidity, 379–381, 380, 381
 - radiation, 370–375
 - temperature, 378–381, 379, 380, 381
 - turbulence, 381–388
 - wind, 375–377, 377, 378
- Air mass modification, 334, **334–336**
 - cloud, 334–336
 - fog, 334–336
 - humidity, 334–336
 - temperature, 328–346
- Air pollution meteorology, 7, 8, 346, 360
- Airflow, **336–360**
 - around buildings, 346–353
 - around hills, 353–360, 354, 357
 - over an urban area, 336–346
- Albedo, 20, 31, 32, 34, 35, 375
 - bare surface, 31, 35
 - change, 35
 - cloud, 35
 - snow and ice, 31, 35
 - urban areas, 23
 - vegetation, 32, 35, 375
 - water surface, 31, 35
- Altitude of the sun, 31, 35
- Anemometer, 217
 - cup, 217
 - hot-wire, 227
 - laser, 227
 - propeller, 227
 - sonic, 217, 227
- Annual temperature waves, 48, 49, 53, 58
- Antarctic, 78, 82, 83, 104, 104, 106, 106
- Anthropogenic heat, fuel consumption, 22, 23, 339, 340
- Applications, 6, 25–26, 43–44, 60, 85–86, 109–110, 139, 160, 185, 211, 239, 264, 317, 362, 388–389
 - atmospheric boundary layers, 317
 - energy budget, 25–26
 - evaporation, 264
 - humidity, 85–86, 264
 - micrometeorology, 6–9
 - nonhomogeneous boundary layer, 362
 - radiation budget, 43–44
 - soil temperature, 60
 - surface fluxes, 239
 - temperature, 85–86
 - turbulence, 160
 - turbulence theories, 185
 - wind distribution, 109–110, 211
- Arctic, 78
- Atmospheric boundary layer *see* Boundary layer

- Atmospheric pressure, 63–66, 89, 118
 gradient, 89–90, 118
 reference, 65
- Atmospheric scales, 1
 large scale, 1
 mesoscale, 1
 microscale, 1–2
 small/local scale, 1–2, 277
- Average, **149–152**, 164, 166–169
 ensemble, 150, 164, 166, 296, 302, 308, 313
 spatial, 149–150, 166
 temporal, 149, 150, 166
- Baroclinic atmosphere, 93–94
 Baroclinic effect, 93, 94, 97, 275–276
 Baroclinic planetary boundary layer, 93, 97
 Barotropic atmosphere, 93
 Barotropic planetary boundary layer, 96, 96, 274
- Beer–Bouguer law, 373
- Blackbody, 28, 30, 37
 equivalent temperature, 29–30, 30, 36
 radiation laws, **28–29**
- Bluff body, 346–347
- Boras, 359–360
- Boundary layer, **1–4**, 6–8, **89–110**, 120–135, 145, 146, **188–211**
 atmospheric, 1, **2–4**, 5, 37, 89–110, 132, **188–211**, **266–317**

Viscous flow, **113–139**

- sublayer, 168

von Karman constant, 191, 216, 218, 279

Vortex, 352, 355, 360

- horseshoe, 350
- von Karman, 350

Wake, 346–349

- cavity, 348–349, 352
- far wake, 350–351, 354
- near wake, 350–351, 354

Water surface *see* Ocean surface

Water vapor, 37, 62–63, 66–68, 80, 81, 234–235, 247–263

- absorption of radiation, 34, 36, 37, 37
- exchange coefficient, 243, 253
- mixing length hypothesis, 175
- mixing ratios, 66–68
- pressure, 66–68, 85, 85, 257–259, 379–380, 380
- specific humidity, 62–63, 66–68, 80, 81, 247–263, 248, 254

Wave, **52–56**, 198, 201, 260

- amplitude, 53, 54, 55, 55
- development stage, 200, 201
- frequency, 53
- period, 53
- phase speed, 53, 54, 201

Wavelength, 28

Wien's law, 29

Wind

- geostrophic, **89–95**
- gradient, 94
- thermal, **89–95**
- turbulence, 5

Wind direction, **95–109**

- backing, 97
- diurnal variation, 107–108, *108*, *109*
- profile, 102
- shear, 95–97, 102, 106
- veering, 95–97, 106

Wind distribution, **89–110**, 188–198, **223–231**

- measurement, **101–109**, 235
- over water, 198, 200–202, 260
- planetary boundary layer, **101–106**, *102*
- surface layer, 188–198, 223–224, 234–235, 324, 326

Wind drag, 7–8, 205, 206, 207

- neutral drag coefficient, 205, 206

Wind hodograph, 106, *106*, 125, *125*, 127–128

Wind shear, 91–93, 102, 216–226

- dimensionless, 216–226, 219, 367
- geostrophic, 91, 102

Wind speed, **95–109**, 188–198, **223–231**

- diurnal variation, 107–108, *108*, *109*
- profile, **101–109**, *102*, 188–198, *189*, *193*, 223–224, 234–235, 260, *261*, 270

Wind veering, 95–97, 106, *107*

Zenith angle, 31, 33

Zero-plane displacement, 202–203, *203*, 251, 365–366
